INTERN EXPERIENCE

CENTILLION LABS | DevOps Engineer Intern
Nov 2023 – Feb 2024 |Bangalore

- Engineered AWS Infrastructure as Code using Terraform, integrated with CircleCI, optimizing resource deployment and reducing time-to-market.
- Created and deployed GCP Kubernetes (Autopilot) clusters via Terraform, ensuring efficient and scalable application deployments.

ARISTOTLE INTELLIGENCE | Product Developer
Jan 2024 – Mar 2024 |Bangalore |Intern

- Developed and deployed an AI application, leveraging AWS for scalable and efficient cloud hosting.
- Enhanced application functionality by integrating APIs and optimizing system performance.

CHAINAIM CORP TECHNOLOGIES | Platform Engineer
Aug 2024 – Nov 2024 |United States |Intern

- Developed and deployed a technical documentation site using Docusaurus, improving user guidance and resources.
- Managed deployment of ACTUS Hackathon Challenge infrastructure to enhance platform scalability.

SYSTIMANX | Product Developer
Mar 2024 – Dec 2024 |Madurai |Intern

- Developed a chatbot to identify former employees who joined as freshers.
- Integrated the chatbot with internal company databases, ensuring seamless and efficient data retrieval for user queries.

PROJECTS

KUBERNETES DEPLOYMENT | Minikube K8s |Docker |Github
Deployed a MERN stack application on a Minikube cluster, managing both backend and frontend services. Integrated MongoDB for efficient data storage and retrieval, ensuring scalability and secure configuration management.

CROP RECOMMENDATION SYSTEM | Machine Learning |Live
Developed a crop recommendation system using machine learning and real-time APIs to provide farmers with data-driven crop suggestions. Implemented algorithms for real-time processing, enhancing agricultural decision-making.

PRODUCT PERSONALIZATION | MERN |Docker |Github
Developed an AI-powered personalized product system for the Farm2Bag platform. Utilized machine learning algorithms to analyze user behavior and preferences, delivering tailored product suggestions to boost sales and enhance user engagement.

SNAPURL | MERN |Docker |Kubernetes |Live
Developed a MERN stack-based application for URL shortening, featuring custom naming options and QR code generation. Enhanced usability with a sleek interface and deployed the application on a Minikube cluster for scalability.
